

EnviroThermEco

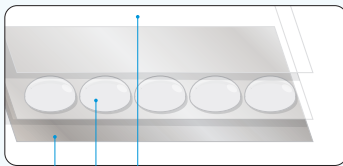

by SANCELL

The most environmentally friendly and cost effective thermal liner yet!

EnviroThermAir10

by SANCELL

Back Layer
10mm Bubble
LDPE Metallised Layer

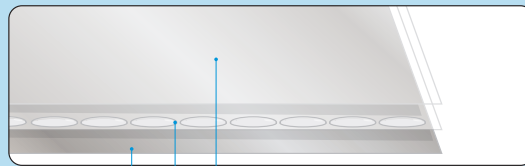

Our most popular thermal liner! The 10mm profile provides cushioning protection for goods in transit, decreasing the costs of damaged parcels.

EnviroThermEco

by SANCELL

Back Layer
Air Space
LDPE Metallised Layer

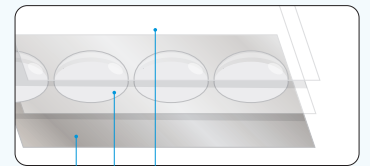

Whilst providing the same thermal properties as EnviroThermAir, the lower profile requires less energy and fossil fuels to transport, store and recycle. Save costs and the environment with EnviroThermEco!

EnviroTherm Eco takes up to 75% less space than EnviroTherm Air!

- Storage Savings
- Cost Effective
- Less Recycling Space
- Transportation Savings

EnviroThermAir20

by SANCELL

Back Layer
20mm Bubble
LDPE Metallised Layer

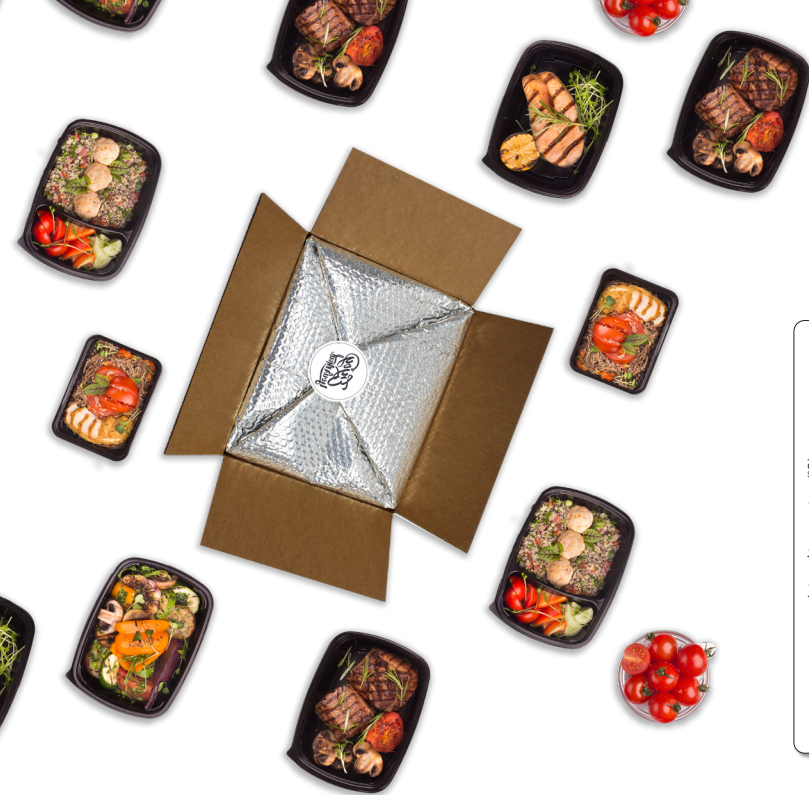

The 20mm profile provides superior impact protection to minimise the risk of damaged parcels and the associated costs.
